EDUCATION

Civilingenjör (M.Sc.Eng.) in Interaction Technology & Design | Umeå University **09/2021 – 01/2026**

Masters Thesis: "Epistemic Limits and Formal Logic: Learning About the Richness of Traditional Ecological Knowledge Through AI". Supervised by Prof. Frank Dignum.

Focus: Used Social Practice Theory and formal logic to analyze the epistemic boundaries of AI representations in collaboration with the TAIGA Centre for Transdisciplinary AI.

PUBLICATIONS & ACADEMIC HONORS

Best Paper Award | Student Conference in Computing Science, Umeå University (2025)

Falk, T. (2025). "Designing Responsible AI: The Power of User-Selected Metrics". In T. Hellström (Ed.), Proceedings of Umeå's 28th Student Conference in Computing Science (USCCS 2025), pp. 9–21. Department of Computing Science, Umeå University. Awarded for research developing a novel AI evaluation framework integrating user-selected UX metrics to operationalize Responsible AI principles.

Runner-Up Demo Paper | BPM Conference (2025)

Edh, J., **Falk, T.**, Kanon, F., Simonsson, E., Sjödin, H., Wincent, J., Barar, E., Blümel, R., & Kirchdorfer, L. (2025). "A Business Process Simulation Tool Bridging Control-Flow and Resource-Centric Paradigms". *In Proceedings of the Demonstrations & Resources Forum, co-located with the 23rd International Conference on Business Process Management (BPM 2025).* Seville, Spain. Status: Published.

Award for Honorable Contributions | NTK Student Union (2025)

Recognized for bridging industry and academia and improving inclusivity for women in computer science.

RESEARCH & PROFESSIONAL EXPERIENCE

Software Engineer (Frontend) | Sartorius **02/2026 – Present**

Developing user interfaces for advanced data analytics and process management within the biopharma sector. Translating complex, high-stakes data models into intuitive, user-centered workflows.

Technology Ethics Research Intern | Ericsson **06/2025 – 12/2025**

Mapped emerging regulations shaping future technology use cases and conducted 6 expert interviews to translate complex insights into value-creating workflows. Benchmarked 21 risk assessment tools and developed a conceptual ethics assessment tool for applied research, presented to internal stakeholders.

Responsible AI Research Intern | AI Policy Lab, Umeå University **08/2024 – 02/2025**

Conducted socio-technical research to bridge the gap between theoretical AI governance and practical software implementation. Analyzed 27 AI policies to map organizational opportunities and co-designed the foundational interdisciplinary AI evaluation framework.

SKILLS & METHODOLOGIES

Socio-Technical Research: Qualitative User Studies, Empirical Fieldwork, Research through Design (RtD), Socio-Technical Systems Analysis.

AI Governance & Theory: Responsible AI Frameworks , Knowledge Representation (Logic/Symbolic) , AI Policy & Regulation (EU AI Act), Social Practice Theory (SPT), Machine Learning, RAG.

System Engineering & Prototyping: Software & Interface Development (Python, Java, C#, TypeScript, React), SQL, API.

Languages: Swedish (Native), English (Fluent- Academic & Professional).

ACADEMIC COMMUNITY & LEADERSHIP

Voluntary work at NTK Student Union **07/2022 – 10/2025**

Organized 5+ industry–academia events with a focus on improving inclusivity for women in computer science. Managed social media, created a new graphic profile to increase engagement, and contributed to restructuring the board's organization for better operational efficiency.
